OVERVIEW

The Cibo warehouse has a complete section stocked with jumbo rolls of basic materials. The quantities are huge. A permanent stock of approximately 1,500 rolls in some 400 different grades or grit size ranges guarantees that you will find what you are looking for. Are you looking for rolls in an unusual width? Please contact Cibo -- we will make them for you in any width you need.

(*) Micro-mesh achieves the best results provided a light mist is used. The use of an exessive amount of water is not recommended with Micro-mesh.

USE OF THE TABLE

Simply look at the material you want to work on, select one or more of the abrasive materials recommended by Cibo, and you will be referred to the page on which you can find the roll you require. The referral page contains the most prevalent grit types and sizes.
However, customisation is also the norm at Cibo. If you need a roll a size not listed in the table, please do not hesitate to contact Cibo. We will manufacture it for you in almost no time.

Take note: this label only displays the sizes that are most suited for that specific application according to Cibo. Should you require a broader overview, please return to the comprehensive overview of the available basic materials on page 58.

Properties	Page
Very flexible abrasive cloth, for universal manual use in metal working.	**247**
High-quality, very flexible abrasive cloth for general manual use in metal working. Also a perfect partner for grinding hard wood types.	**248**
The nylon fibres are combined into a three-dimensional web structure using thermo-setting synthetic resin, and are available in various grit types with an aluminium oxide grit. The result is an elastic abrasive material with an open structure that is easy to use and provides an even and constant finish. The tex material does not affect the geometrical shape of the work pieces. A/O creates a good long-lasting finish at high speeds.	**250**
The nylon fibres are combined into a three-dimensional web structure using thermo-setting synthetic resin with an aluminium oxide grit type. The result is an elastic abrasive material with an open structure that is easy to use and provides an even and constant finish. The tex material does not affect the geometrical shape of the work pieces. CP has an increased grinding capacity at higher speeds. This material provides the brush structure with a slightly glossy effect.	**252**
Zirconium oxide grain on an "F" paper base. This product is ideally suited for grinding hard and dry wood types due to the extremely abrasion-resistant zirconium oxide grit. The KP950F is also highly efficient when using stainless steel.	**244**
Very flexible abrasive cloth, for universal manual use in metal working.	**247**
High-quality, very flexible abrasive cloth for general manual use in metal working. Also a perfect partner for grinding hard wood types.	**248**
Micro-Mesh is a concept whereby extremely precisely calibrated grit crystals are bonded with a flexible glue on a supple cotton base. Due to the elastic positioning, this grit always comes in contact with the workpiece at a positive angle. This ensures a constant and even scratch depth. This ingeniously thought out design guarantees an extremely even, constant and precise finishing pattern.	**249**

Very flexible abrasive cloth, for universal manual use in metal working.	247
High-quality, very flexible abrasive cloth for general manual use in metal working. Also a perfect partner for grinding hard wood types.	248
The nylon fibres are combined into a three-dimensional web structure using thermo-setting synthetic resin, and are available in various grit sizes with silicon carbide grit. The result is an elastic abrasive material with an open structure that is easy to use and provides an even and constant finish. The tex material does not affect the geometrical shape of the work pieces. In comparison with A/O, S/C provides a finer, even and matt line structure. Primarily used to create a decorative finish.	252
Antistatic, aluminium oxide on a strong "E" backing. Specially developed with a heavier, less tear-resistant backing for heavier, manual work and for applications on light manual grinding machines.	242
Antistatic, semi-open coated aluminium oxide on a very strong "F" paper base. The antistatic property ensures the easy removal of dust . The KP949FO is a product that can be used for various purposes. Perfect grade for both dry and hard woods as well as for those of a softer quality with a higher level of resin.	243
Zirconium oxide grain on an "F" paper base. This product is ideally suited for grinding hard and dry wood types due to the extremely abrasion-resistant zirconium oxide grit. The KP950F is also highly efficient when using stainless steel.	244
Antistatic silicon carbide grit on a very strong "F" base. Ideally suited for use in sanding wooden floors and parquet.	246
Very flexible abrasive cloth, for manual use in metal working. Also a perfect partner for grinding hard wood types.	247
High-quality, very flexible abrasive cloth for general manual use in metal working. Also a perfect partner for grinding hard wood types.	248

The result is an elastic abrasive material with an open structure that is easy to use and provides an even and constant finish. The tex material does not affect the geometrical shape of the work pieces. A/O creates a good long-lasting finish at high speeds.	250
Open coated aluminium oxide grit with an active abrasive ingredient on a film backing. Extremely tear-resistant. Does not clog up, long life span, extremely large grit size range. Can be used for many purposes, especially with more intensive grinding operations. Ideal for finishing of soft wood types and car repair, paints, lacquers and varnishes. Used both wet and dry.	240
Open coated aluminium oxide with grinding aid on flexible "C" paper. Very pliable and flexible, cannot saturate, adapts easily to the workpiece and guarantees a beautiful, even finish. Ideal for grinding primary coats, primers, sealers, lacquers, paint, varnish, filler and wood.	241
Antistatic, aluminium oxide on a strong "E" backing. Specially developed with a heavier, less tear-resistant backing for heavier, manual work and for applications on light manual grinding machines.	242

	Film	-	A/O	●	

Grit type: 80-120-320-400

Description: Open coated aluminium oxide grit with an active abrasive ingredient on a film backing. Extremely tear-resistant. Does not overflow, long life span, extremely large grit size range. Can be used for many purposes, especially with more intensive grinding operations. Ideal for finishes of soft wood types and car repair, paints, lacquers and varnishes. Used both wet and dry.

Paper rolls: importance of the backing

In choosing the correct paper type, flexibility and the tear-resistance are two important parameters. These are determined by the weight of the paper. The letters "A" through "F" refer to the weight. "A" refers to the lightest type of paper, "F" the heaviest.
Generally speaking, paper types A, B and C are a lot more flexible and can be used for finer grit types. The grades on a flexible backing ensure a finer and more homogenous finish in comparison to heavier backings. The latter are preferred for coarser grit types and therefore for more aggressive applications.

ZIRC. | PAPER

KP950F

application	backing	weight	grit type	coating	waterproof
	Paper	F	ZIRC.	–	–

Grit type: 40-60-80-100-120-150-180-220

Description: Zirconium oxide grain on an "F" paper base. This product is ideally suited for grinding hard and dry wood types due to the extremely abrasion-resistant zirconium oxide grit. The KP950F is also highly efficient when using stainless steel.

Please consult Cibo on sizes, qualities and grit.

Paper rolls

SP705EO

PAPER | S/C

application	backing	weight	grit type	coating	waterproof
	Paper	E	S/C	●	–

Grit type: 220-240-280-320-400-500-600-800

Description: Antistatic silicon carbide grit on a "E" paper with the addition of zinc stearate. This paper is ideally suited for finishing. The addition of stearate ensures that the grinding process is cool and that the grit does not become saturated. Ideal for the intermediate grinding of primers, sealers, paints, varnishes, polyester and polyurethane lacquers, etc.

Please consult Cibo on sizes, qualities and grit.

CLOTH ABRASIVES | CALIBRATED A/O

application	backing	weight	grit type	coating	waterproof
	Cotton	F	Calibrated A/O	–	*

Grit type: MFR1500 (P800)-MFR1800 (P1200)-MFR2400 (P1500)-MFR3200 (P3000)-MFR3600 (P3500)-MFR4000 (P4000)-MFR6000 (P5000)-MFR8000 (P6500)-MFR12000 (P8000)

Description: Micro-Mesh is a concept whereby extremely precisely calibrated grit crystals are bonded with a flexible glue on a supple cotton base. Due to the elastic positioning, this grit always comes in contact with the workpiece at a positive angle. This ensures a constant and even scratch depth. This ingeniously thought out design guarantees an extremely even, constant and precise finishing pattern.

Please consult Cibo on sizes, qualities and grit.

MFX

CLOTH ABRASIVES | CALIBRATED A/O
